sublimation. The design is printed onto a special fleece which perfectly matches the acoustic qualities of the sound system.

Erlor+Pless printed the 'Lambert Styles' via sublimation. A transfer paper was printed on a Roland FP740 using sublimation inks, before transferral with a Klieverik Kalander on a special fleece, which was cut by hand.

In order to meet the client's requirements, Erlor+Pless had to achieve excellent print quality on the fleece itself, as well as ensure it was cut correctly to fit the dimensions of the sound system itself.
